THERMA METAL

ThermaMetal uses patented technology to stop ice damming on new standing seam metal roofs. A specifically designed, three sided raceway secures UL-listed self regulating heat trace cable in place for highly efficient, direct heat transfer.

Panels are installed directly onto the ice and water shield and do not require any modifications to the new roof structure. ThermaMetal has a receiver compatible with new seams, which are then clicked on for a clean, water-tight installation.

RISK REDUCTION

ThermaLine defends against structural damage as well as slip and fall hazards.

ENERGY EFFICIENT

Replacing heat tape with ThermaLine can generate savings of up to 65%.

DURABILITY

ThermaLine cable is protected by the panel, decreasing expected maintenance to just once every 10 years.

CURB APPEAL:

Our panels are an attractive addition to your property and are offered in a variety of designs and colors.

SAFETY:

Patented technology, UL listed and compliant with NEC Article 426 requirements.

SPECIFICATIONS

Material Selection

24 gauge steel or 021" copper

Dimensions

ThermaMetal is available in 5' lengths and can be trimmed onsite. Panel thickness is 10", 20" or 30" depending on size ordered. Drip edge specifications must be noted prior to order.

Heating System

Commercial grade self-regulating heat cable, UL-approved for roof and gutter de-icing. Available in 240 or 120 volt and 6, 8, 10 or 12 watts.

Components

ThermaMetal panels, 4" transition panels, heat cable, and commercial grade adhesive. Rake caps are recommended but not required.

Electrical Requirements

120VAC or 208-277VAC. NEC Article 426.28 requires 30mA ground fault circuit protection for roof ice melt systems.
