

THERMA RAIL

 (970) 279-7828

 sales@thermaline.us

 thermaline.us

ThermaRail uses a low profile, patented design to prevent icicles and ice dams from forming along the edge of metal roof structures by compressing commercial grade, UL-listed, self regulating heat cable directly against the underside of existing metal drip edges. ThermaRail provides a highly efficient 10" melt back zone from the roof edge.

RISK REDUCTION

ThermaLine defends against structural damage as well as slip and fall hazards.

ENERGY EFFICIENT

Replacing heat tape with ThermaLine can generate savings of up to 65%.

DURABILITY

ThermaLine cable is protected by the panel, decreasing expected maintenance to just once every 10 years.

CURB APPEAL:

Our panels are an attractive addition to your property and are offered in a variety of designs and colors.

SAFETY:

Patented technology, UL listed and compliant with NEC Article 426 requirements.

SPECIFICATIONS

Material Selection

24 gauge steel or 0.021" copper

Dimensions

ThermaRail is available in 5' lengths and can be trimmed onsite. Pitch is required at the time of order.

Heating System

Commercial grade self-regulating heat cable, UL-approved for roof and gutter de-icing. Available in 240 or 120 volt and 6, 8, 10 or 12 watts.

Components

ThermaRail panels, heat cable, and fascia installation hardware.

Electrical Requirements

120VAC or 208-277VAC. NEC Article 426.28 requires 30mA ground fault circuit protection for roof ice melt systems.
