# THERMA SEAM

ThermaSeam ice melt panels use patented technology to stop ice dams on your standing seam roof. The system is engineered to easily attach to new and existing standing seams, creating a warm roof and eliminating the risk of snowpack. A three-sided raceway securely compresses a single or double run of commercial grade self regulating heat trace cable for direct heat transfer to the metal roof. No modification or penetration to the existing roof is required.

## RISK REDUCTION

ThermaLine defends against structural damage as well as slip and fall hazards.

## ENERGY EFFICIENT

Replacing heat tape with ThermaLine can generate savings of up to 65%.

## DURABILITY

ThermaLine cable is protected by the panel, decreasing expected maintenance to just once every 10 years.

## CURB APPEAL:

Our panels are an attractive addition to your property and are offered in a variety of designs and colors.

## SAFETY:

Patented technology, UL listed and compliant with NEC Article 426 requirements.

## SPECIFICATIONS

### Material Selection

24 gauge steel or 021" copper

### Dimensions

ThermaSeam is available in 5' lengths and can be trimmed onsite.

### Heating System

Commercial grade self-regulating heat cable, UL-approved for roof and gutter de-icing. Available in 240 or 120 volt and 6, 8, 10 or 12 watts.

### Components

ThermaSeam panels, heat cable, seam clamps and padded loops.

### Electrical Requirements

120VAC or 208-277VAC. NEC Article 426.28 requires 30mA ground fault circuit protection for roof ice melt systems.

## COMPLETE YOUR SYSTEM:

**THERMAFLASHING**

**THERMAGUTTER**
